

## Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact [support@jstor.org](mailto:support@jstor.org).

3 Inches perpendicular Height, above the horizontal Plane on which the Meridian Line was drawn.

Mr. *Wheler*, at *Otterden-Place*, near *Lenham* in *Kent*, observed the Beginning at  $5^h 49' 0''$ , and the End at  $7^h 31' 49''$ . His Observations were made with a Telescope of 15 Feet in length, and his Time was also rectified by a Meridian Line; but it was done by a Transfit of the Rays through an Hole at a much greater Height. For the Brass Plate in which the Hole was made was fix'd to a Window in the Roof of his Hall, at the Height of 27 Feet above the Meridian Line on the Floor.

With my humble Duty to the *Royal Society*, I remain,

Sir,  
*Your humble Servant*,  
Stephen Gray.

VI. *An Observation of the same Eclipse of the Sun, by Mr. J. Milner, at Yeovil in Somersetshire, communicated in a Letter to Dr. John Allen, M. D. F. R. S.*

*S I R,*

I Beg leave to present you with the Observations I made on the Eclipse *May 2, viz.*

The Beginning at $5^h 34^m 00^s$	$17^{\circ} 45'$	}	Sun's Alt.
at 6. 00. 00	$13. 36$		
End at 7. 14. 30	$2. 45$		

I made Use of a Quadrant 2 Feet radius.

*J. Milner.*

Lat. *Yeovil*,  $51^{\circ}$ .

*May 4, 1733.*
